## Allergocrom<sup>®</sup> Eye Drops

### Contents:

10 ml contains:

Active ingredient: Sodium Cromoglycate 0.2 g

Other ingredients: Benzalkonium chloride, Disodium edetate, Glucose monohydrate and water for injections

### Indications:

Acute and chronic allergic conjunctivitis and non-specific irritations of the conjunctiva.

### Contraindications:

Although there is no indication of teratogenic effects Allergocrom<sup>®</sup> is not recommended for use during the first three months of pregnancy.

Contact lenses should not be worn during treatment with Allergocrom<sup>®</sup> eye drops.

### Side-Effects:

Hypersensitivity and allergic reaction to benzalkonium chloride. In rare cases temporary burning, foreign-body-sensation, and chemosis have been reported.

### Dosages and Directions for Usage:

If not otherwise prescribed, instill 1 drop 4 times daily into the conjunctival sac.

Unscrew the small cap (covering the nozzle), invert the bottle and gently squeeze out the prescribed number of drops into the conjunctival sac.

Treatment with Allergocrom<sup>®</sup> should not be stopped after symptoms improve. Rather, its use should be continued until the patient is no longer in contact with the allergen (pollen, house dust, mold, etc.).

Immediately after application of Allergocrom<sup>®</sup> eye drops vision may be impaired for a short time.

**Stability:**

Allergocrom® should not be stored above 25 °C.

With proper care, Allergocrom® can be used up to 6 weeks after the bottle has been opened.

Allergocrom® should not be used beyond the expiration date (imprinted on the packaging carton).

**Store this drug of the reach of children!**

**Information for Patients:**

Instructions from your physician on how to apply the eye drops should be strictly followed to ensure an efficient therapy.

**Properties:**

Many substances in our environment cause allergic reactions. These so called allergens (e.g. pollen) set symptoms such as redness, pruritus, swelling, tearing or sneezing to the mucous membranes of eye and nose. The allergic reactions are mediated by a physiologic substance, histamine, which is stored in the mast cells. When an allergen contacts a mast cell histamine is released into the surrounding tissues causing allergic symptoms. The active ingredient of Allergocrom®, cromolyn sodium, stabilizes the mast cell membrane and subsequently inhibits the release of histamine after exposure to allergens. Therefore Allergocrom® eye drops can be used prophylactically; the development of allergic symptoms will be prevented.

**Packaging:**

10 ml bottle
